

From the Year Head's Desk

26 May 2025

Dear Parents,

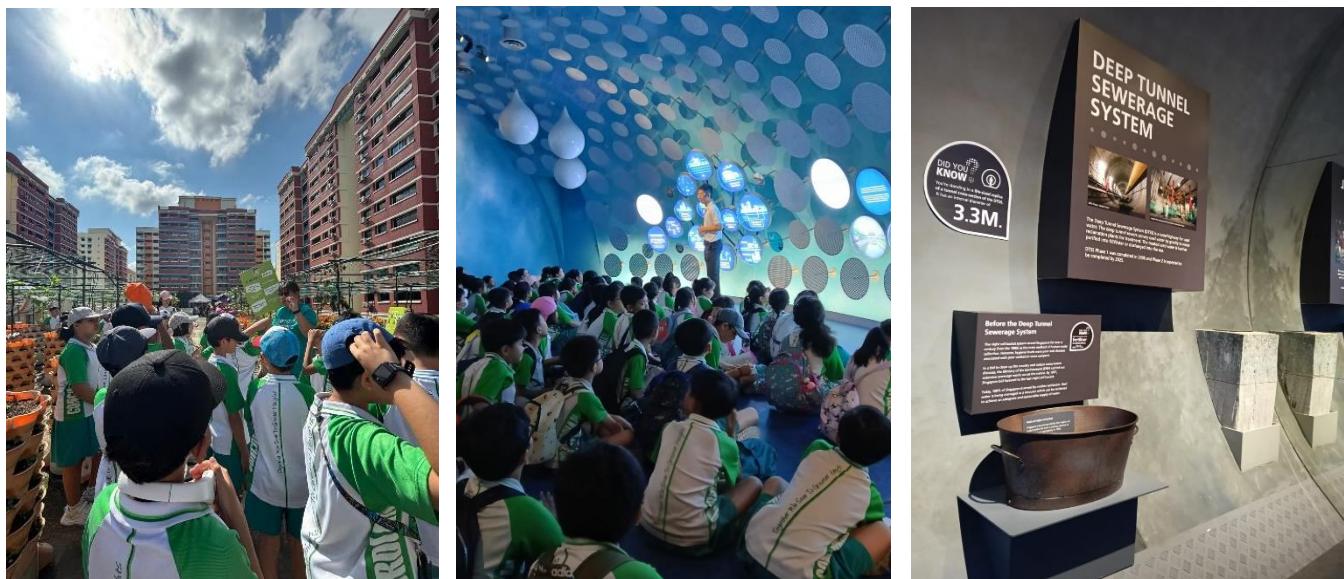

At Concord Primary, we believe in providing rich learning experiences that go beyond the classroom. In this issue, we highlight on the school's Applied Learning Programme (APL) where students applied their learning through collaborative, real-world tasks.

We hope you enjoy reading about how our Concordians are learning, growing, and shining in different ways.

🧠 Interdisciplinary Project Work (IPW) E3 Reasoning+ @ Concord

Concord's IPW E3 Reasoning+ equips students with the skills to work collaboratively, apply knowledge from various subjects, and present their ideas confidently. This 8-day programme blends classroom learning with real-world application through hands-on activities and meaningful discussions.

Here's what our Primary 3 and Primary 4 students have been up to:

Primary 4 IPW: Food Sustainability

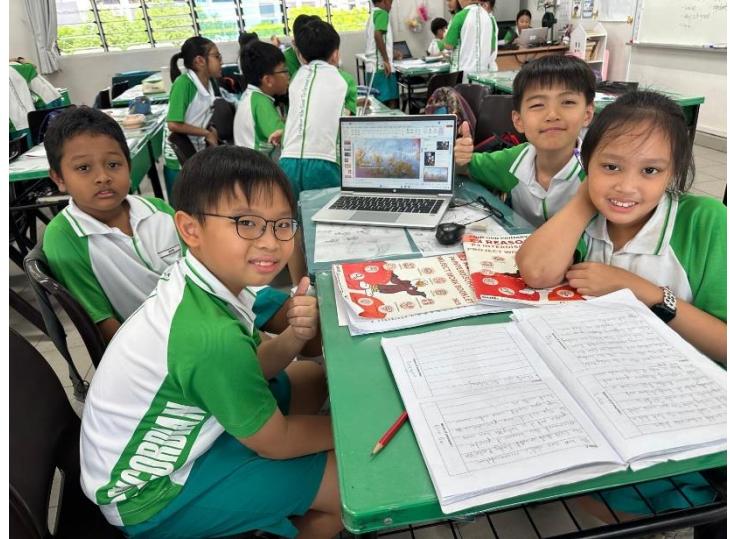

Our Primary 4 students embarked on an enriching IPW focused on the theme of Food Sustainability. Students explored how Singapore addresses food security through local production, import diversification, and the use of technology in urban farming.

Students examined various aspects of food sustainability, including the challenges of over-reliance on imports, the impact of climate change on food systems, and the importance of innovation in farming. Using E3 Reasoning+ skills, they analysed data, discussed solutions, and developed ideas to promote food resilience.

A key highlight was the learning journey to the **Urban Farm @ Tampines**, where students experienced first-hand how food can be grown in urban spaces using high-tech systems. They interacted with guides, observed hydroponic methods, and reflected on how such solutions can support Singapore's future food needs.

The IPW experience concluded with group presentations where students proposed creative, sustainable food solutions. They also reflected on their learning journey in their IPW booklets. The IPW not only fostered deeper inquiry and collaboration but also helped students appreciate their role in building a more sustainable future.
